

2019 Mazda MX-5: More Power, Greater Pleasure

- More powerful, higher-revving SKYACTIV-G 2.0 engine
- Upgraded i-ACTIVSENSE safety technologies
- Brown soft top complements MX-5's KODO–Soul of Motion Design

Leverkusen, 20. June 2018. Mazda is launching an update of its bestselling roadster, refining the joy of open-top motoring and enhancing the inimitable thrill of the *Jinba Ittai* driving experience. Both soft-top and RF versions of Mazda's brand icon feature marked improvements in dynamic performance, an upgrade to Mazda's i-ACTIVSENSE safety technologies, and refinements to design and packaging, making the world's favorite roadster more exciting and satisfying to drive than ever before.

- Updated 1.5 and 2.0-litre SKYACTIV-G petrol engines¹ with improved combustion and greater torque comply with new WLTP/RDE test cycle and meet Euro 6d Temp emission regulations. Both powertrains benefit from refined acceleration control to minimise lag between throttle applications and vehicle response.
- SKYACTIV-G 2.0 engine now higher-revving and acoustically tuned, with maximum engine speed raised from 6,800 to 7,500 rpm, maximum horsepower increased from 160 to 184 PS @ 7,000 rpm, and maximum torque from 200 to 205 Nm @ 4,000 rpm.
- Five new i-ACTIVSENSE safety technologies²: Advanced Smart City Brake Support which detects vehicles and pedestrians ahead and helps avoid collisions, and Smart City Brake Support (Reverse) which detects vehicles and obstacles behind, as well as Driver Attention Alert, a Traffic Sign Recognition System and a Rear View Camera.
- The award-winning KODO-Soul of Motion design is enriched through a darker paint finish for both 16" and 17" alloy wheels, and the availability of a new brown canopy colour for soft-top models.³

The 2019 Mazda MX-5 goes on sale throughout Europe from August 2018 onwards.

1) Vehicles are homologated in accordance with the new type approval procedure WLTP (Regulation (EU) 1151 / 2017; Regulation (EU) 2007/715). To provide comparability the referred values are NEDC - values determined in line with Implementation Regulation (EU) 1153 / 2017
Fuel consumption: SKYACTIV-G 1.5l: 6,3 l/100km, CO₂ emissions: 143g/km | SKYACTIV-G 2.0l: 6,9-7,2 l/100km, CO₂ emissions: 156-164g/km
2) System availability varies according to trim level and market
3) Availability depends on trim level and market
